## New York City Area Luxury Homes With Electric Vehicle Chargers

by [Haven Team](#)

Newport | Newport Leasing Office

Modern buyers have a wide range of priorities when purchasing a property, but one of the most sought-after contemporary amenities is an Electric Vehicle (EV) charger. The number of Americans driving EVs increases each year, with fuel efficiency and sustainability being major benefits. Homes that accommodate EV ownership have become a necessity for many.

In New York City, developers are increasingly prioritizing adding EV charging stations to their residences to entice buyers. Several premier luxury developments and homes across the New York City area now feature charging stations and private EV parking. Below, we explore some of the most appealing options for buyers with electric vehicles.

# 720 West End Avenue

720 West End Avenue is a beautifully designed pre-war building by Emery Roth that has been updated to seamlessly blend timeless elegance with modern luxury. Located on the Upper West Side, the building offers scenic Hudson River views and stylish interiors by Thomas Juul-Hansen. With a private garage—featuring parking spots with EV chargers available for purchase—and proximity to the Henry Hudson Parkway, this building will attract attention. 720 West End will house 131 residences, priced from \$1 million to \$12 million, with highly desirable amenities such as a Billiards Lounge with a golf simulator, areas for squash and basketball, and a fitness studio. Units are currently available [for sale online](#).
